

**How is Magnet DAO a value-add
and strategic investor?**

STRONG COMMUNITY

Community is key to any Web3 project.

We have an extremely enthusiastic and active community, with **30k+** members on Discord and **16k+** Twitter followers.

By having Magnet DAO as an investor, you will immediately get access to our **large, active community**.

DISTRIBUTED NETWORK

We have over 6,000 tokenholders and your token will eventually be airdropped to our stakers.

This distributes the investment to over 6,000 people and significantly **reduces wallet concentration**.

We think this is **much healthier** for the network than a traditional VC investment.

TEAM OF EXPERTS

Magnet DAO has a team of 10, covering all areas needed for a successful project - including senior solidity development, front-end engineering, graphics design, marketing, and business development.

We also have an extremely active group of contributors in our DAO. If you ever need anything done or assistance, **we can lend a hand.**

While we are investors, we are also building projects ourselves and are working on incubating projects, so **we have a builder mindset** as well.

LIQUIDITY

The size of our treasury allows us to put this to work for **help with liquidity needs**. Our investment has the potential to incorporate us providing liquidity on your platform.

PARTNERS

We are currently partnered with **Trader Joe** and **Yeti Finance**, and are actively talking with all of the major projects and personnel in the **AVAX ecosystem**.

ACCOMPLISHMENTS

Our team has **successfully raised \$11.6 million** in aggregate from our community offering (\$1.6m sold out in 32 minutes) and public sale (\$10m sold out in 39 minutes), and **developed our own custom smart contracts and launch mechanisms** for each launch. These launches included over 6,000 unique participants.

CHECK SIZE

Many VC firms ask for large checks (\$500K+). We are okay with a **smaller check size**, as we are a newer firm looking to get exposure, traction, and diversification.
